Cliff Sunflower is a beekeeper, environmental educator, storyteller and performer. In his audience participation program he brings everyone into an imaginary trip into the swamp on his farm using storytelling, poetry, puppetry, music and dance. They will learn how fruits and flowers depend on the pollination of bees to reproduce and what that means to each of us: "Without bees we would not have apples".

After the assembly and honeybee dance, the attendees will be divided into 2 workshops to taste the various honeys, to visit up close with an observation hive of bees and each will make a beeswax candle to take home. Troop 40336 will assist your scouts in creating a bee craft. Fun Patch included.

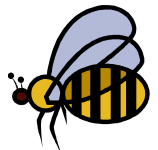

----- Snacks/drinks will be served. -----
